BIONTECH - PROJECT LIGHTSPEED

52' (ENG, GER, FRE)

With the BioNTech vaccine, medical scientists Uğur Şahin and Özlem Türeci achieved a breakthrough after years of research.

The mRNA technique, which has been an important component for cancer research for many years, is now making history as a vaccine against Covid-19. But where does cancer research go from here? Can the mRNA technique also help to fight malaria? The film shows the incredible achievement of a start-up company from Mainz for global health.

Original Title:	In Lichtgeschwindigkeit zum Impfstoff - Das Projekt BioNTech
Year:	2021
Produced by:	Berlin Producers
Partners:	arte, ZDF, SRG
