TASMANIA – WEIRD AND WONDERFUL

52' (ENG, GER, SPA, FRA, ITA)

Tasmania is an island full to bursting with strange and wonderful wildlife.

Moving between the lives of these key creatures as the seasons progress, we showcase the landscapes that make this island so special. We also meet a whole cast of other Tasmanians – including white wallabies, eastern quolls, jumping ants and glowing worms. 'Tasmania: Weird and Wonderful' is a visual feast filled with intimate stories and amazing discoveries from one of the few places on the planet that can still be considered truly primeval.

Original Title:	Tasmanien - Eine Insel steht Kopf
Year:	2017
