WILD UGANDA

52' (ENG, GER, SPA)

Savannahs, swamps, bushland and rainforests: Uganda boasts one of the most diverse landscapes on Earth.

Up until very recently, virtually nothing was known about the behaviour of Uganda's most prominent animal inhabitants – mountain gorillas. We follow the Kyagurilo group, a family of twelve gorillas through the dense, steep jungle of Bwindi Impenetrable Forest.

Original Title: Wildes Uganda
 Year: 2018
