UNDER COVER – EVERY BODY NEEDS A COAT

50' (ENG, GER, SPA, FRA, ITA) 

From fur to feathers, from scales to shells – every creature has some form of characteristic outer layer.

Although it's often said that one should never judge a book by its cover, that's exactly what 'Under Cover' will do – explore how the different types of outer shells in the animal kingdom have evolved over millions of years, the purposes they serve and how they allow species to survive and thrive in a wide variety of habitats and conditions.

Original Title: Stacheln, Fell und Federkleid
Year: 2019
Produced by: Terra Mater Factual Studios
