RARE SURVIVORS – CHINA'S ICONIC WILDLIFE

50' (ENG, GER)

From snow leopards to wild horses, and from alligators to elephants, China's iconic wildlife is a lot more than just pandas.

Mist swirls around the base of Shanghai's skyline. From the city, tigers and monkeys seem as unreal and distant as dragons and mermaids emerging through the mist. Yet they do exist, as rare survivors in an extraordinary and diverse landscape.

Some are well known and much loved, and others important and iconic animals filmed for the first time. They are all charming, fascinating, and fragile.

Original Title:	Wild und Wunderbar – Chinas unbekannte Natur
Year:	2020
Produced by:	Terra Mater Factual Studios, Mark Fletcher Productions, Colorful Nature Films
