

NATURE . WILDLIFE

PERFECT PARENTING

50' (ENG, GER, SPA, FRA)

How to raise your young!

Parenting is not an easy task – not by a long shot. Just looking at us humans, raising children is a nerve-wracking task. But for animal parents, mother nature can be even more demanding. So, animals evolved different strategies for rearing their offspring.

Our planet's fauna is beautiful and multifaceted, as are the ways of animal parenting. Single mothers and fathers, same-sex couples, and whole colonies of sisters – all are working hard to ensure their offspring's survival. And, just as a side note: this film is perfect to keep your little ones occupied – at least for fifty minutes.

Original Title:	Tierisch gute Eltern
Year:	2021
