ENGINEERING EXTREME – REHAULING A HIGH SPEED TRAIN

55' (ENG, GER, FRE, ITA)

A behind-the-scenes look into the technical challenges of the maintenance of a TGV!

The Hellemmes technical centre is the largest maintenance centre of the SNCF, France's national railway company. Located near Lille, this ultra-modern 28-hectare site is specialised in the maintenance and modernisation of high-speed trains. With the help of 3D images, this documentary unveils all the technical challenges of these spectacular operations managed by no less than 1,000 employees.

Year: 2022
