THREE SHADES OF GREEN

3 x 52' (ENG), 3 x 45' (GER, FRE)

The three-part series Three Shades of Green explores the rugged, fertile and gentle sides of Ireland.

Only but a few other countries in Europe are as exposed to the forces of nature as Ireland. With its winding rivers, lakes, bogs and moors that are home to all kinds of plants, the people of Ireland had to adapt to the diverse landscape. We meet prawners and gardeners, cheese makers and sea anglers. Upon closer look, a world of wonders reveals itself.
