In the open wilderness of Africa, there are only 20,000 lions living a free life. In the last decade, humans have killed hundreds of thousands—mostly for purely hunting purposes. In recent years, canned hunting, where animals are bred for 4-5 years then released into a confined area, then killed for sport has become the trend. The trophy is the corpse of the dead lion. This documentary describes the still legal industry of lion-killing in South Africa and delves into the work of the animal preservationists of Lionsrock. Lionsrock, which was created as refuge to these big cats, is led by the global animal protection organization Four Paws. The animals that take refuge in this sanctuary have usually escaped captivity in zoos, circuses or private holdings, where they have lived in terrible conditions. Four Paws have since 2007 saved the lives of many lions and still do so today.
